Responsibility for generations

The Hörmann family business has over 85 years of experience as a construction component specialist. This gives us an obligation to both current and future generations. That's why environmental responsibility plays such an important role for us. With this in mind, we develop innovative solutions for sustainable products and intelligent environmental protection.

“A GOOD REPUTATION MUST BE EARNED.”

August Hörmann

In keeping with the tradition started by the company's founder, the Hörmann brand is a true promise of quality and, with sales of over 20 million doors, door frames and operators, is one of Europe's most successful suppliers. Due to the comprehensive international sales and service network, Hörmann is your strong partner for high-quality construction components.

WE THINK AND ACT GREEN. As a family business, we are very conscious of our responsibility to future generations and offer all products for residential construction CO₂-neutral as standard. The Hörmann sustainability strategy aims to reduce and avoid emissions. We cover 100% of our electrical power needs at all European production sites with genuine green electricity from renewable sources. We also apply many other measures to reduce our consumption and save more than 75000 tonnes of CO₂ each year. We work with ClimatePartner to offset the remaining emissions by supporting certified climate protection projects.

Brand quality made in Germany

The family-owned company Hörmann offers all important construction components for building and renovating projects from a single source. We manufacture in highly specialised factories using state-of-the-art production technologies. Our employees work intensively on new products, continual further developments and improvements to details. The results are patents and unique products on the market.

LONG-LASTING. GUARANTEED. All doors are developed and manufactured by Hörmann. Endurance tests under real conditions ensure mature series products with Hörmann quality. For this reason and thanks to quality assurance without compromise, you can enjoy a Hörmann residential internal door for years to come. You are literally choosing a door for life.

CONVINCING PREMIUM WORKMANSHIP. For the door and frame construction, we rely exclusively on high-quality timber materials. Screw connections guarantee an excellent fit and seamless frame appearance. Frame reinforcements in the door leaf and sturdy door fittings ensure high stability and resistance. The modern, in-house production technology for the Duradecor surface finish impresses with consistently high quality and an impact resistance that is on average 48% better* than that of tested CPL surfaces of other manufacturers.

* except Duradecor ultra matt

Premium quality that you can feel in form and design

Your interior style sets the tone! Are you looking for residential internal doors that harmonise with your home? Get ready to be impressed by the high-quality Duradecor surface finish with vibrant colours, perfectly reproduced timber decors and expressive textures. You can also choose from numerous real lacquer surface finishes and real wood veneers. Or you can design your residential internal doors yourself with the paintable priming film. It doesn't get any more individual than that!

**Extremely
impact-resistant**

PERMANENT DURABILITY. With an impact resistance that is on average 48% better, the high-quality Duradecor surface finish is vastly superior to CPL surfaces from other manufacturers. It is also especially easy to clean, heat-resistant and almost as robust as a kitchen worktop.

No fingerprints

ULTRA MATT. Fingerprints on residential internal doors? Not with Duragrain ultra matt! That's because this surface finish combines high resistance to fingerprints and other soiling with an exquisite matt deluxe appearance in a previously unattainable matt finish. When it comes to both aesthetics and feel, the ultra matt surface finish is in a league of its own!

**Vibrant colour
coating**

VIBRANT COLOUR EFFECT. The lacquered surface of our timber doors has a classic and high-quality look. The even, multi-layer coating on the whole unit, made up of the door frame and door leaf, results in a uniform surface finish and a seamless edge transition. The deep and brilliant colour effect is truly impressive.

Impressive right down to the tiniest detail

We want our residential internal doors to impress you right down to the tiniest detail. You can enjoy your Hörmann residential internal doors for years to come thanks to standard features such as the 4Protect edge guard or our light-impermeable seal that blocks out light from an adjoining room for an undisturbed and restful night's sleep.

4Protect edge guard

RESISTANT EDGE. The standard 4Protect edge guard on flush-closing doors and rebated doors with angular edges offers a high resistance to impact, wear and scratches. This means that doors with a Duradecor surface finish are ideally protected against everyday wear and tear.

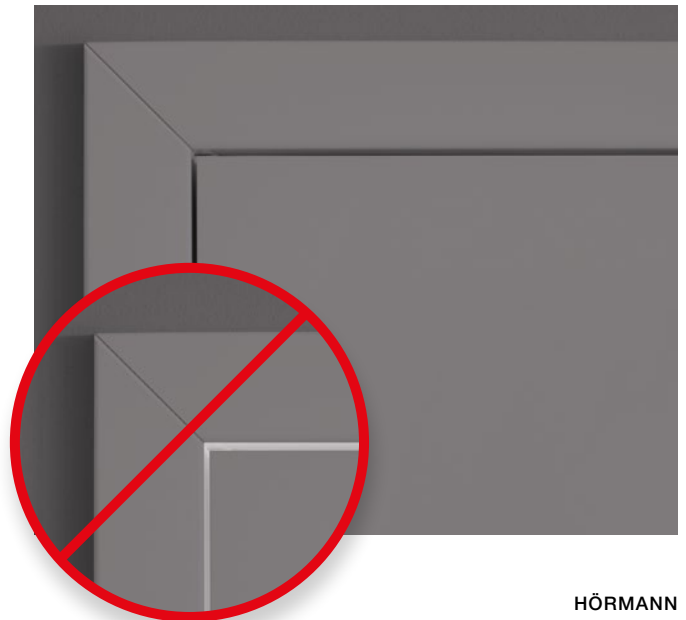

SEAMLESS WHITE. The rebate edge of all doors with a white Duradecor surface finish is specially coated for a seamless appearance. In addition, the 4Protect edge guard ensures a seamless transition to the door leaf in doors with angular edges. You can enjoy a continuously white door view without the bothersome unsightly edges typical of standard doors.

LIGHT-IMPERMEABLE WHITE SEAL. Hörmann's brand quality impresses with exquisite details. Take the standard light-impermeable seal for flush-closing doors, for example. With no visible light gap, you'll no longer be disturbed by light from the adjoining room.

The standard 4Protect edge guard impresses offers a seamless view without disrupting pencil edges on flush-closing doors and rebated doors with angular edges.

The standard light-impermeable seal on flush-closing doors blocks out light from the adjoining room.

The long-lasting frame

Our high-quality timber and steel frames give your home twice the pep: the elegant, stylish appearance creates a pleasing ambience, and the frames are also extremely durable. Their high-quality, robust design makes them hard-wearing, and they are easy to clean and maintain over the long term.

HIGH-QUALITY TIMBER FRAME. The elegant 3 mm **1** edge radius impresses with a modern rectangular look and a seamless edge finish. The 25 mm-thick jamb lining **2** ensures high form stability, and the premium-quality Duradecor surface finish **3** also makes the frame particularly resistant to impacts and scratches.

→ For further information, see from page 98.

ROBUST STEEL FRAME VARIOFIX. All our residential internal doors are also available with the powder-coated VarioFix steel frame. The corner joints feature high-quality welding and a flush polish. This means that there are no visible mitre cuts in the frame corners. The robust frame construction can withstand run-ins with toy cars and vacuum cleaners. Thanks to the high-quality galvanisation, even cleaning solutions cannot damage the frame.

→ Further information can be found on page 103.

MINIMALISTIC ZEROLINE FRAME. The Zeroline frame **4** impresses with its clean lines and minimalist design, enabling a perfectly flush-fitting wall and door leaf, virtually invisible frame construction and concealed hinges (for comparison see Fig. **5** Standard frame with flush door leaf).

→ Further information can be found on page 104.

ProLine

Do you value the feel-good factor in your home? Then the doors from the ProLine series are the perfect choice for you. The door leaf in a flush or rebated version creates a cosy atmosphere that invites you to relax.

→ Further information can be found starting on page 60.

Duradecor Dusty grey

Duradecor smooth surface finish

The extremely impact-resistant Duradecor surface finish is the right choice for your home. Whether you're keen on elegant White lacquer, modern grey or cosy timber decors, you're sure to find a residential internal door to suit your taste.

→ Further information can be found on page 78.

Door fittings black.edition

Do you love to see black in your home? Then our black.edition doors are the perfect choice for you. These doors feature striking details in elegant Jet black, subtly yet effectively embracing the latest design trend. Enhance your new residential internal doors with black door fittings, door hinges, lever handle sets and more. This creates a striking contrast, particularly when paired with white or grey surface finishes.

→ Further information can be found starting on page 88.

Real wood veneer surface finish

Natural, cosy, unique – real wood veneers are produced from high-quality precious woods and are truly unique.

→ Further information can be found on page 83.

Duradecor texture surface finish

This surface stylishly combines a feeling of real wood with ease of care. A wood grain texture is embossed into the door leaf, making the characteristic wood texture palpable.

→ Further information can be found on page 79.

TOP CENTRE LEFT. Detail view of Linen Anthracite grey

TOP CENTRE RIGHT. Flush-closing timber door ProLine Slate Dusty grey

TOP RIGHT. Detail view of Slate Dusty grey

BOTTOM. Flush-closing timber door ProLine ultra matt black

Ultra matt, Slate, Linen surface finish

The three unique surface finishes bring together a modern colour range featuring shades of white, taupe, dusty grey, anthracite grey and black. The ultra-matt surface finish stands out for its exceptional elegance, offering a silk matt look and feel with a depth of finish never seen before. We recommend the Slate textured surface finish for a modern yet cosy interior design. With its fine, tangible structure, the Linen surface finish blends particularly well with wood shades and suits a sophisticated, rustic-modern decorative style.

→ Further information can be found starting on page 80.

Real lacquer surface finish

Lacquered surface finishes with glossy or matt effects make your timber doors something rather special. The perfectly processed surface finish with an even coating and a seamless edge transition radiates simple elegance.

→ Further information can be found on page 82.

NEW. DesignLine Slat

The doors of the DesignLine Slat have a minimalist appearance without conventional lever handles. Instead, a subtle insert in the door leaf acts as an unobtrusive handle bar, enhancing the minimalist, modern look. The handle bar is available in glass or any surface finish, matching the door leaf with a real lacquer surface finish for an elegant door view.

→ Further information can be found on page 61.

DesignLine Plain

The Plain style creates elegant accents with inlaid, flush-fitting applications. For a modern and exclusive door design, you can choose from 4 different applications: stainless steel , black , bronze or gold.

→ Further information can be found on page 63.

TOP. Flush-closing timber door DesignLine Plain real lacquer Traffic white RAL 9016, applications in black

BOTTOM. Rebated timber door DesignLine Stripe 15 Duradecor White lacquer

DesignLine Stripe 15

The Stripe 15 style with embossed grooves offers you a tasteful design with that little something extra. Flush-closing doors and rebated doors with angular edges are equipped with the high-quality 4Protect edge guard as standard.

→ Further information can be found on page 62.

DesignLine Groove / **NEW.** DesignLine Line

The grooves milled into the door leaf and the high-quality lacquer finish make the styles Groove and **NEW.** Line elegant eye-catchers. The DesignLine Groove stands out with its subtle V-groove **1**, while the DesignLine Line impresses with a striking U-groove **2**.

→ Further information can be found starting on page 64.

Matching appearance for timber and glass doors

Timber and glass doors with a matching appearance lend your entire home a seamless, harmonious look. The DesignLine Groove with matching glass doors is the ideal choice for a cohesive look throughout your home. The glass doors also blend harmoniously into the ambience with the Duradecor Slate and Linen designs, thanks to the same textured appearance.

→ Further information can be found starting on page 64.

NEW. DesignLine Brisk

The doors of the DesignLine Brisk with black joints add stylish accents. The doors with black milled joints in a solid-coloured cover plate are available in over 40 styles and create an extremely elegant look when combined with the black.edition lever handles and fittings. The black joints also perfectly complement the Hörmann steel loft doors for a harmonious overall appearance. The combination with real wood veneers made from high-grade exotic woods appeals with its natural look and feel.

→ Further information can be found starting on page 64.

DesignLine Rail

We recommend the timber and glass combination as the perfect complement to the DesignLine timber door styles.

ClassicLine Kontura

The contour-milled profiles and slight V-groove lend the 46 mm-thick door leaf a particular charm, making it blend in perfectly with modern and period properties alike.

→ Further information can be found on page 73.

GlassLine

GlassLine doors offer you many clear advantages. Glass doors are elegant and chic. They give your home an open feeling and lend each room a very special charm. GlassLine is also particularly easy to clean: all the styles with sand-blasted glass feature nano coating – so you benefit from seeing hardly any fingerprints!

→ Further information can be found starting on page 74.

Steel loft doors

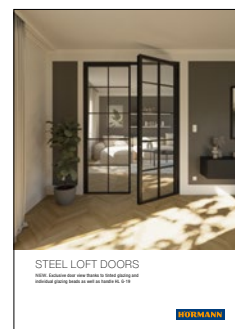

Do you value timeless elegance and modern minimalism? If so, our loft doors are perfect for you. The harmonious balance of steel and glass gives your interior design a special touch. The loft doors are available up to a door set size of 5000 × 4000 mm! Doors in this size are also very elegant thanks to their narrow profile view of 76 mm (door) and 20 mm (fixed glazing) and the surface-mounted rails.

TOP LEFT. Single-leaf hinged door with side elements and transom light

TOP RIGHT. Double-leaf pivot door style 2

BOTTOM. Double-leaf sliding door with side elements

Further information can be found in the "Steel loft doors" brochure.

Sliding doors

TIMBER OR STEEL SLIDING DOOR FRAMES. Our single-leaf and double-leaf room solutions open up new possibilities for making ideal use of your living space. Timber frames in Duradecor smooth, Duradecor textured, Duradecor ultra matt, Slate, Linen and real lacquer or real wood veneer surface finishes create a harmonious whole with the door leaf. The robust steel frames feature an impressive high-quality coating.

→ Further information can be found on page 94.

TOP RIGHT. Slide Compact sliding door with glazed side element profile black.edition, Clear grey door leaf, Flat handle black.edition, fitting in the reveal

BOTTOM RIGHT. Slide Compact sliding door with vertical stop, GrooveGlass 85 door leaf, recessed handle 6402 stainless steel, fitting in front of the reveal

SLIDING DOOR SYSTEM SLIDE COMPACT. The track profile for the sliding door leaf is available in the surface finishes matt stainless steel, Jet black or White. The profile can be fitted both in front of the wall and in the reveal. With a glazed side element, the system presents a translucent, space-saving door solution for wide passages. For a door leaf weight of up to 60 kg, the Slide Compact system is equipped with a SafeClose in order to gently close the door leaves.

→ Further information can be found on page 94.

Reverse timber door

This door version boasts an almost flush-fitting transition between door leaf and frame on the hallway side, opening through the frame into the room beyond at the same time. As with flush-closing doors, you can achieve an eye-catching door view in the hallway.

→ Further information can be found on page 105.

LEFT. Flush-closing timber doors Reverse with reveal rebate, real lacquer Traffic white RAL 9016, lever handle Linea matt stainless steel

RIGHT. Flush-closing timber doors with Zeroline frame, real lacquer Traffic white RAL 9016, lever handle Linea black matt

Zeroline frame

The Hörmann Zeroline frame is the perfect choice for all connoisseurs of clear design language. The cleverly conceived structure captivates with a minimalist design that enables a flush-fitting door leaf and features a virtually invisible frame construction owing to a frame face of just 2 mm, plus concealed hinges. The result is a door / frame combination that meets even the most exacting design demands.

→ Further information can be found on page 104.

Function and construction project doors

TIMBER CONSTRUCTION PROJECT DOORS. For all requirements in commercial and residential construction, our timber doors can be equipped with additional functions such as fire protection, security or acoustic insulation. Doors are especially exposed to stress in schools, nurseries, offices and hotels. To meet these demands, we have developed our premium-quality DuraProject door surface finish that offers the same product properties as an HPL surface.

→ Further information can be found starting on page 106.

Functions at a glance

Fire and smoke protection

Fire protection can save lives! A suitably equipped door can protect against penetrating flames (for at least 30 or 90 minutes) as well as prevent the penetration of dangerous combustion gases. Fire-rated / smoke-tight door sets are only available as a complete package which includes the door frame and all door fittings.

Acoustic insulation

Acoustic-rated doors are in demand in areas such as apartments or offices where noise levels can be high. The connection between the door and frame is crucial here. It is an essential component for guaranteeing the required acoustic insulation.

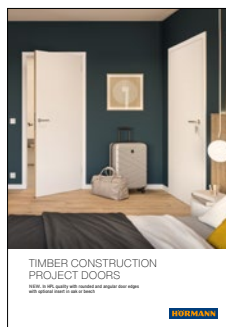

Safety

Suitable special functions can significantly reduce the risk of burglary. Hörmann recommends resistance class RC 2 or, even better, RC 3 for apartment entrance doors.

Climatic class 3

Doors in this class feature a special door leaf construction that balances the temperature and moisture differences between rooms with different uses, such as between an unheated cellar and a warm hallway.

For further information on DuraProject, see the brochure.

TOP RIGHT. Timber double-action door HPH-180 with profile frame

BOTTOM. Flush-closing timber door, DuraProject White lacquer

Double-action doors

Double-action doors are particularly suited to situations where there is no 'free hand', such as when serving food and drinks in restaurants and canteen kitchens: they open smoothly and easily. The HPL or timber double-action doors are a real eye-catcher for catering and shopfitting applications.

DOUBLE-ACTION DOORS

WWW.HOERMANN-DOORS.COM

HOERMANN

For further information on double-action doors, see the brochure.

CLIMATE AND APARTMENT ENTRANCE DOORS. For multiple-occupancy dwellings, our doors offer high acoustic insulation levels, a reliable function even when temperatures in the hallway differ from those inside the rooms, plus certified security. Choose from three equipment packages for added security and convenience.

→ Further information can be found starting on page 106.

GARAGE CONNECTING DOORS. Fire protection of at least 30 minutes is required by law at the point where the garage transitions to the living area. The standard smoke protection offers protection from exhaust fumes and the optional acoustic insulation function helps block out intrusive engine noise. The garage connecting door is equipped with RC2 security features as standard. The optional RC3 equipment provides extra security.

→ Further information can be found starting on page 106.

Accessories

DOOR OPERATOR PORTAMATIC. Open and close your residential internal doors easily and automatically via a hand transmitter or button. Whether you are physically disabled or would simply like more convenience, this technology is sure to make your everyday life easier. The door operator PortaMatic not only features an array of functions and settings but also minimal power consumption. In addition, the PortaMatic is up to 25% cheaper than similar door operators and can be subsidised up to 100% by your nursing care insurance.

Find out more about support options at www.hormann.co.uk/home-owners-and-renovators/operators/internal-door-operators

BOTTOM RIGHT. Rebated timber door ProLine, Duradecor White lacquer with PortaMatic door operator in white

DOOR LOCK OPERATOR SMARTKEY. Easily open your door lock at the press of a button with your hand transmitter, radio internal push button or directly via the sensor field on the SmartKey. So there's no need to put down your shopping in order to open your door. Even with a walker, wheelchair or pram, it is much easier to enter your house or apartment because you can open the door from a distance. Locking takes place either by pressing a button or automatically after a specified period of time. This securely locks your door and provides the greatest possible protection against burglary.

GlassLine

More light for your home

Laser technique

This glass finish offers fine details and shading. The depth effect creates fascinating impressions that are further enhanced by the brilliance of the glass door.

Glass type Clear

With this glass type, the glass door creates a subtle, interesting contrast. The iron oxide in the glass produces a slight "green shimmer".

Sand-blasting

For those who value individuality, the sandblasting technique draws delicate designs in the glass surface. The matt surface finish with nano coating guarantees fewer fingerprints.

Tip

Fewer fingerprints thanks to nano coating

Glass type Clear White

The Clear White glass type creates an almost colour-neutral transparency.

Silkscreen

Design meets superior surface finishing: the highly scratch-resistant surface is easy to clean and resistant to soiling.

Tip

Particularly easy to clean

Single-pane safety glass

All glass doors with styles feature 8-mm-thick single-pane safety glass. This glass type is also available in tinted or solid matt versions, as well as in a cool loft design.

Fluted glass

The fluted glass on the glass door is created by a fine V-groove. A clear or satin-finished glass is used depending on the preferred opaqueness. The fluted glass impresses with special patterns, its tactile feel and the extraordinary play of light produced by the prism effect.

Laminated safety glass

This 10-mm-thick glass type consists of 2 panes that are firmly connected with a colour or matt plastic film.

Duradecor smooth

Permanent durability

Extremely impact-resistant

4Protect edge guard

The extremely impact-resistant Duradecor surface finish is the right choice for your home. Whether you're keen on elegant White lacquer, modern grey or cosy timber decors, you're sure to find a residential internal door to suit your taste. Our flush-closing doors and rebated doors with angular edges in the Duradecor surface finishes White lacquer, Light grey, Dusty grey, White Parchment and White Ash are equipped with the high-quality 4Protect edge guard as standard.

- 1** White lacquer RAL 9016
- 2** **NEW.** White lacquer RAL 9010
- 3** White Parchment
- 4** Light grey RAL 7035
- 5** Dusty grey RAL 7037
- 6** French Beech

The colours and decors shown are subject to the limitations of the printing process and cannot be regarded as binding. All RAL colours based on RAL colour chart. **Please consult with your local Hörmann sales partner.**

Duradecor texture

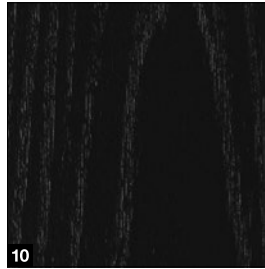

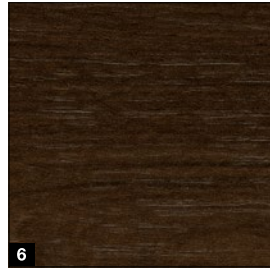

Characteristic wood texture

Extremely impact-resistant

4Protect edge guard

This surface stylishly combines a feeling of real wood with ease of care. A wood grain texture is embossed into the door leaf, making the characteristic wood texture palpable. Flush-closing doors and rebated doors with angular edges in the Duradecor texture surface finish Brushed White are equipped with the high-quality 4Protect edge guard as standard.

- 1** Grey Oak*
- 2** Wild Oak*

* also with vertical grain

Duradecor ultra matt, Slate, Linen

Harmoniously coordinated surface finishes and colours

Ultra matt

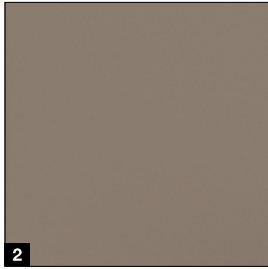

Extremely impact-resistant

4Protect edge guard

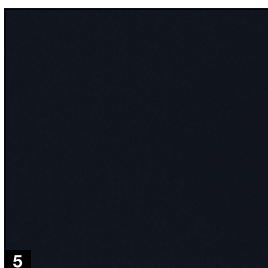

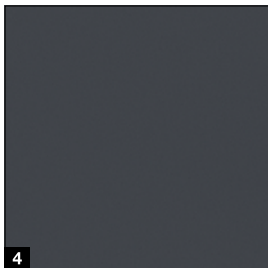

No fingerprints

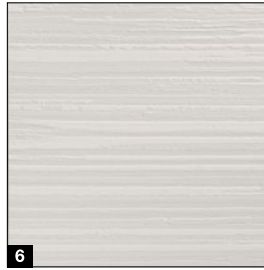

This particularly elegant surface finish will impress even the most discerning customers in terms of both aesthetics and feel. Ultra matt combines high resistance to fingerprints and other soiling with an exquisite matt deluxe appearance in a previously unattainable matt finish.

- 1** White
- 2** Taupe
- 3** Dusty grey
- 4** Anthracite grey
- 5** Black

The colours and decors shown are subject to the limitations of the printing process and cannot be regarded as binding. **Please consult with your local Hörmann sales partner.**

Slate

Extremely impact-resistant

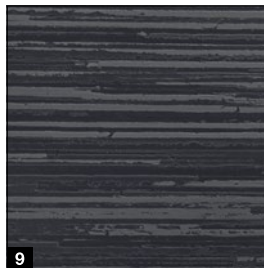

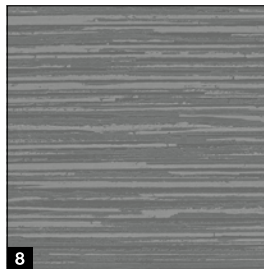

4Protect edge guard

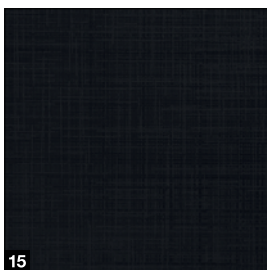

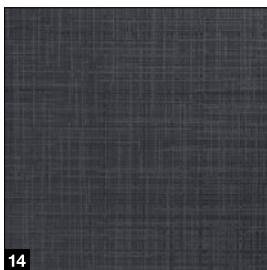

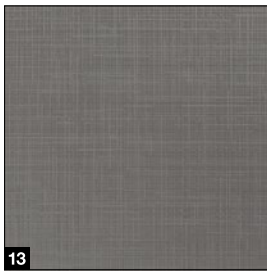

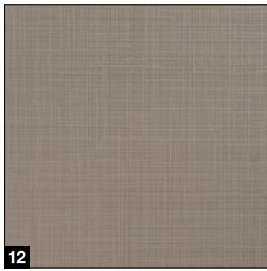

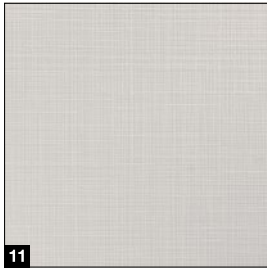

We recommend this textured surface finish for a modern yet cosy interior design. The light-shadow contrast on the raised texture gives it a very pleasant and natural vibrant appearance. This variant is also available as a glass door.

- 6** White
- 7** Taupe
- 8** Dusty grey
- 9** Anthracite grey
- 10** Black

The colours and decors shown are subject to the limitations of the printing process and cannot be regarded as binding. **Please consult with your local Hörmann sales partner.**

Linen

Extremely impact-resistant

4Protect edge guard

With its fine, tangible structure, the Linen surface finish blends particularly well with wood shades and suits a sophisticated, rustic-modern decorative style. At the same time, the surface is robust and easy-to-clean. The Linen surface finish is also available to choose as a glass door.

Real lacquer / real lacquer matt

Glossy colour effect and stylish matt finish

Vibrant colour coating

RAL to choose
(not real lacquer matt)

Smoothly painted doors with a flawless finish elevate your home to something truly exceptional: for a personalized touch, you can customize your Hörmann residential interior door with a brilliant colour effect in any RAL shade of your choice. Or you can enhance your doors with an elegant matte surface finish in our preferred lacquered colours for a sophisticated and stylish ambience. All lacquers give both the door leaf and the frame a smooth uniform coating with a seamless edge transition. So you can enjoy a radiant, rejuvenated ambience.

Variants for lever handle and lock rose escutcheons

Lever handle and lock sets are a defining element for the overall appearance of your residential internal door. Hörmann offers different variants of the lever handle sets shown:

S STANDARD ROSE ESCUTCHEON. The approx. 10 mm-thick lever handle and lock rose escutcheons are surface-mounted on the door leaf.

F FLAT ROSE ESCUTCHEON. This flat rose escutcheon shape adds just 3 mm, resulting in an elegant door view.

P PLANAR ROSE ESCUTCHEON Perfectly inset in the door leaf, the fully flush-fitting Planar rose escutcheons are especially impressive for fans of design.

Another fine detail is the omission of the drilled key hole, allowing the design the look even more minimalistic and therefore more elegant.

Increased acoustic insulation

Do you want quiet, bright living spaces and workspaces? Then we recommend the optional equipment for revolving glass doors Clear and satin-finished glass with 11 mm laminated safety glass and retractable bottom seal. Look forward to doors with an acoustic insulation value of up to 32 dB (corresponding to acoustic rating category SK 1).

Double-action door hinges

For glass doors

Double-action door hinges

Double-action door hinges are also available as options for all glass doors. This allows the door to be opened from both sides – a highly practical option in areas where space is at a premium. The double-action door hinges can be fitted in the passage frame or directly on the brickwork.

Agita

Matt stainless steel, with pneumatic closing function, maximum door leaf weight 60 kg

Door fittings and handles

For sliding doors

Slide Compact sliding door system

The profile of the sliding door system Slide Compact is supplied as standard in matt stainless steel (shown, left) and optionally in matt Jet black (shown, centre) or White (shown, right).

Sliding door system Slide Compact with additional vertical stop (stainless steel colour) for single-leaf doors, running in front of the wall

Sliding door system in the frame

With the brush seal on the door leaf (shown on left) and the inlet seal in the frame (shown on right), the sliding doors with frame type C running in front of the wall offer optimum protection against odours, noise and draughts – for even greater comfort in your home.

For sliding doors running within the wall, you can use a trip handle to release a door leaf completely concealed in the wall and close the door at the push of a button.

- Double-turn closing cycle
- Retrofit kits available

Hybrid hinge pocket prevents lowering of the door ⁵

- Carrying capacity 80 kg
- Reinforced metal plastic mount
- Secured in jamb lining with 4 screws
- Guiding sleeves extending to front edge of cladding
- For timber and glass doors

High stability thanks to door leaf with frame construction ⁶

- Internal doors with 70 mm frame construction
- On hinge side and lock side

Door and frame types

Custom design and function

Rebated version with round edges

If you value a harmonious overall design, you can't go wrong with this version: The door leaf rests on the frame and has rounded door leaf edges for a harmonious appearance. The rebated door view with round edges is available for all timber doors, except DesignLine Stripe 15 and ClassicLine Montana.

Rebated version with angular edges

If you appreciate a particularly streamlined look, then we recommend this version. The door leaf rests on the frame and has a beautifully designed, angular edge. It is available for all timber doors except for ClassicLine Carolina. In the Duradecor surface finishes with 4Protect edge guard and in the lacquer surface finish, this version boasts a perfectly seamless look.

Flush version

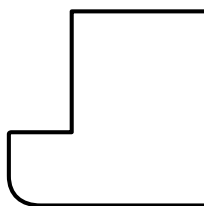

Are you looking for an exclusive door view in your home, with a virtually flush-fitting transition to the frame? Then we recommend a flush-closing door leaf, which harmonises particularly well with modern interior design concepts. This version is available for all timber doors with the exception of ClassicLine Carolina. In the Duradecor surface finishes with 4Protect edge guard and in the real lacquer surface finish, this version impresses with a perfect seamless look.

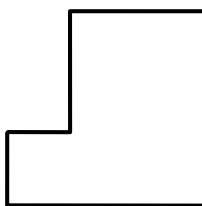

4Protect edge guard

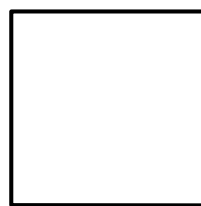

4Protect edge guard

Horizontal view of door leaf

Horizontal view of door leaf

Horizontal view of door leaf

4Protect edge guard

The quadruple edge guard offers impressive features:

1. High impact resistance
2. High wear resistance
3. High scratch resistance
4. Seamless look, meaning that unlike conventional doors, no unsightly edge disrupts the high-quality door view.

Rebated version with angular edges

Flush version

Contrasting edge 4Protect

The 4Protect contrasting edge in 6 colours gives timber doors with the Duradecor surface a special finishing touch.

Door and frame types

Custom design and function

Honeycomb insert

The honeycomb is a door inlay that retains its shape and has an excellent price-performance ratio.

Tubular chipboard spacers

The door inlay consists of individual spacers that are arranged in the best possible layout. This means the door leaf is especially sturdy and suitable for heavy wear.

Tubular chipboard plate

The solid plate with horizontal tubes gives the door leaves a high surface stability. These high-quality residential internal doors are suitable for even extremely heavy wear.

Solid chipboard

The high-quality solid chipboard door leaves have the highest leaf rigidity and are suitable for particularly heavy wear. Doors with glazing cut-outs are available with solid chipboard as standard.

Profile frame

With rounded edges

Profile frame

With angular edges (only for lacquer surface)

Profile frame

With profiling for ClassicLine Georgia and Carolina

Block frame

For fitting in the opening or **fascia frame** for fitting in front of the wall

90° door frame

If you appreciate a highly linear door view, we recommend our 90° door frame. Unlike a frame with a mitre cut, the frame cladding used in this case has vertical edges. This results in a particularly harmonious look when combined with classic door styles.

VarioFix steel frame

The perfect combination of design, robustness and a long service life

High-quality design

For the steel frame VarioFix, the corner joints feature high-quality welding and a flush polish, meaning there are no visible mitre cuts in the frame corners. In flush-closing doors, the robust construction guarantees a uniform gap dimension, as the door frame can no longer warp after fitting.

Ideal combination

The steel frame harmonises perfectly with other timber frames due to a frame face of 55 mm on both sides. To match our door leaves in Duradecor White lacquer and real lacquer Traffic white, the VarioFix frame is available in Traffic white RAL 9016 with a white sealing profile or in RAL to choose. The frame can be combined with glass or timber door leaves.

Particularly long-lasting

Thanks to the high-quality powder coating, the frame can withstand run-ins with toy cars or vacuum cleaners, and any damage to the surface is easy to repair. Even cleaning water and a thorough washing cannot damage the door frame.

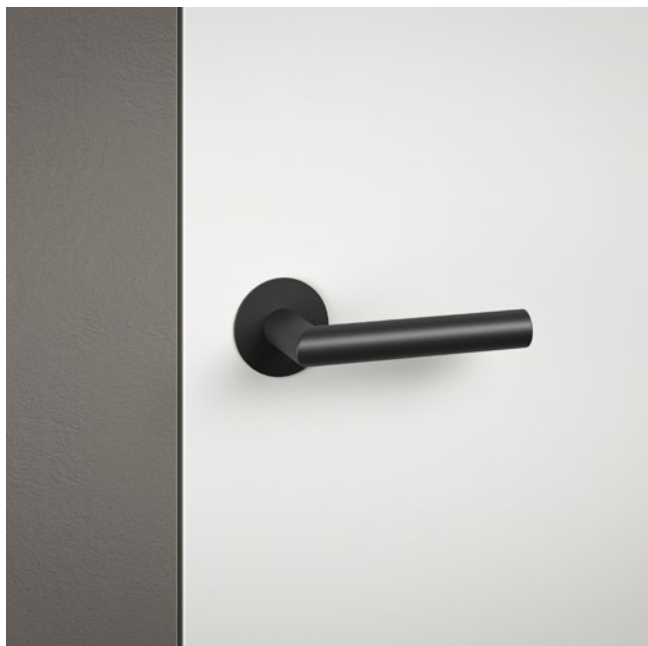

Fast fitting

The VarioFix steel frame can be fitted to all wall types without screw fitting, using 2C foam, like a timber frame. This results in time savings of up to 50% during fitting compared with standard steel frames. Wall tolerances of up to 20 mm are no problem for the steel frame VarioFix. The adjustable decorative rebate easily compensates for different wall thicknesses during renovations and new construction projects.

Zeroline frame

Clean design for modern living space concepts

The beauty of the invisible

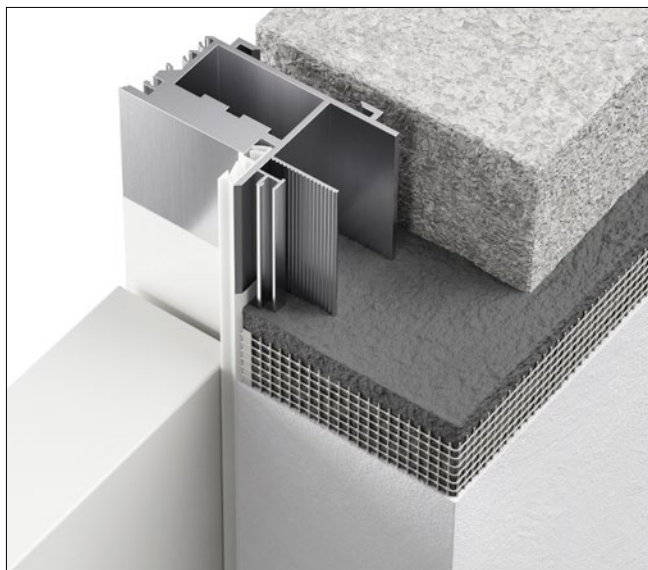

If you value clear design language and appreciate clean, modern design, then the Zeroline frame is the perfect choice. The minimalist appearance impresses with a flush-fitting door leaf, virtually invisible frame construction owing to a frame face of just 2 mm, plus concealed hinges. This door leaf / frame combination is a perfect fit for ambitious designs.

Frame with fabric as standard

The frame is equipped as standard with a woven fabric tape which is applied to the plaster to prevent crack formation. This completely integrates the frame into the wall.

Flush-fitting skirting boards

Skirting boards to match the frame and onto which the plaster can be directly applied are available. Skirting boards can therefore be integrated flush into the wall.

Additional use of a flexible woven fabric prevents cracks from forming in the plaster.

Equipment features

- Flush-closing door leaf
- 40 mm door leaf thickness
- Concealed hinges
- Magnetic catch lock

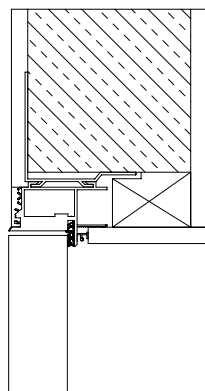

Colours / surface finishes

- Traffic white RAL 9016
- Jet black RAL 9005
- Anodised aluminium

Nominal sizes

Max. height: 2250 mm

Max. width: 1250 mm

Horizontal sectional view with flush-closing door

Reverse timber door

The door has an almost flush-fitting view on the hallway side

Opens through the frame into the next room

If you require a matching, almost flush-fitting door view on the hallway side and the doors need to open through the frame into the room beyond – and not into the hallway as usual – then we recommend our reverse-opening doors (as shown, bottom right).

Elegant appearance

Concealed hinges emphasise the minimalist, modern door view.

Easy to combine

Thanks to the identical appearance of the door leaf and frame with an almost flush-fitting transition, reverse-opening doors can be readily combined with flush-closing doors in the same room or hallway. This results in a harmonious and welcoming overall ambience.

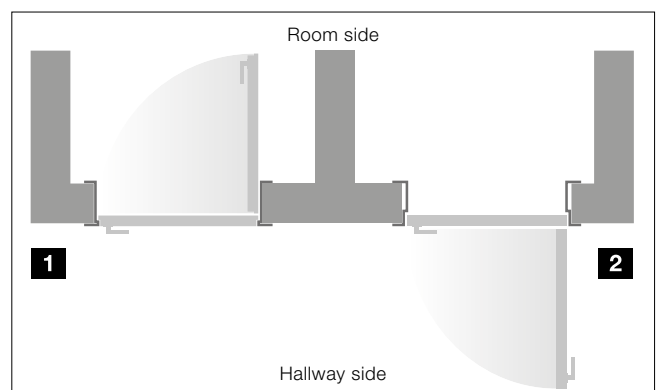

Equipment features

- Flush-closing door leaf with reveal rebate
- 40 mm door leaf thickness
- Concealed hinges
- Magnetic catch lock
- Opening limiter

Nominal sizes

Max. height: 2489 mm

Max. width: 1174 mm

The reverse-opening door (left-hand hinge) opens into the room **1** and the normally opening flush-closing door (right-hand hinge) opens into the hallway **2**.
